

Tranquility is Here to Help: Managing Incontinence During COVID-19

On behalf of everyone at Tranquility, our hearts go out to all those impacted by COVID-19 – this includes not only those diagnosed with the virus, but also their friends and family, those whose jobs and schools have been impacted, and so many more. This is a very stressful time for everyone, especially those who are most likely to be exposed or working with patients who are most at risk. As always, our mission is to **enrich, uplift,** and **enlighten** both those with incontinence and those who help care for them.

Here's how premium incontinence products can help keep patients and caregivers safe during this unprecedented time.

31%

of COVID-19 cases*
are adults ages 65+

45%

of people age 65+
experience incontinence

Extended wear times and protection from leakage minimizes frequent close contact between patients and caregivers to reduce the spread of illness.

Superior moisture wicking reduces incontinence-related medical issues (such as skin breakdown and UTIs), helping to keep patients out of hospitals and lessening the risk of increased exposure.

Maximum absorbency products keep patients comfortable and dry, leading to a better night's sleep which helps to boost the immune system and overall health.
