

# Tranquility is Here to Help: Managing Incontinence During COVID-19

On behalf of everyone at Tranquility, our hearts go out to all those impacted by COVID-19. This is a stressful time, especially for caregivers who are serving our most-vulnerable population. **Ensuring incontinent patients are in the right product is pivotal to managing caregiver workloads, as well as improving patient outcomes.**

Here's how premium incontinence products can help keep patients and caregivers safe during this unprecedented time.

31%

of COVID-19 cases\*  
are adults ages 65+

45%

of people age 65+  
experience incontinence

**Extended wear times and protection from leakage** minimizes preventable close contact between patients and caregivers to reduce the spread of illness.

**Superior moisture wicking reduces incontinence-related medical issues** (such as skin breakdown and UTIs), helping to keep patients out of hospitals and lessen their risk of increased exposure.

**Maximum absorbency products keep patients comfortable and dry,** leading to a better night's sleep which helps to boost the immune system and overall health.
