

TODAY'S SUPERIOR APPROACH TO MOISTURE MANAGEMENT

- Lowered sense of **dignity**
- Frequently woken up for checks and changes
- Problems getting back to sleep
- Increased risk of falls

- Value-based purchasing
- Quality-based outcomes
- **Surveys**

- Greater **dignity**
- Fewer changes
- Better sleep
- Improved mood
- Improved social life
- Confidence
- Satisfied families

- Improved **sleep** and activity
- Fewer **behavior** issues — less anti-psychotic drugs
- **Skin** stays dry resulting in less MASD and fewer wounds
- Elimination of cold, wet feeling against skin results in less urge to get up and toilet and fewer **slips and falls**

- MASD (moisture associated skin damage)
- Falls and injuries
- Great reliance on anti-psychotic drugs to aid sleep

THE PAST

- More frequent checks and changes
- Increased risk of injuries to staff members
- Less time for other important tasks and activities

THE PRESENT

"I can say without a doubt that even though the initial cost seemed higher, we are now using LESS product due to the great effect these Tranquility products have."

"Our skin problems because of wetness are 0 % (when using Tranquility products)."

"We can now focus on resident care and their needs as the problem (wetness leakage) is solved."

"Satisfaction of staff and residents and their families (always most important) has never been higher (since the change to Tranquility products)."
