

Introduction

In October 2018, a large West Cost VA facility agreed to trial the Tranquility Premium superabsorbent underwear, briefs, and underpads. The facility was looking to improve their clinical outcomes in the areas of skin health (IAD), odor reduction, leakage/ containment (urine & feces), sleep patterns, and staff labor. The wound care nurse at the facility did research on different products and hypothesized that their current incontinence products could be improved, which could therefore improve overall patient care including skin health.

Trial Protocol

Overall Trial Results

Staff Survey Results

Based on a 30-day trial, 17 VA facility staff were surveyed on the performance of Tranquility Incontinence Briefs in comparison to the current brand of incontinence briefs used by the facility.

Trial Conclusion

REDUCTION OF IMPROVED PATIENTS' STAFF BURDEN: QUALITY OF LIFE: 82% 00% of staff agree of staff agree of staff agree Fewer clothing Patients Fewer improved sleep/ and linen patient brief slept longer changes changes

The results of this 30-day trial are a demonstration that **Tranquility superabsorbent products could improve overall patient care and staff experience** in several areas:

- Odor was greatly reduced and, in most cases, eliminated.
- Linen changes due to leakage were minimized.
- Brief/product changes decreased.

Tranquility Products

Tranquility products promote skin health by keeping fluid locked away no matter how much pressure is applied to the product when sitting, standing, walking, or lying down. Our superabsorbent technology allows for extended wear time, letting your patients sleep soundly and socialize without fear of an accident, all while preventing unnecessary bed strips and clothing changes. We have the products, programs and knowledge to support your facility in acquiring the excellent clinical outcomes you desire.

Tranquility products are clinically proven to ensure:

- Advanced Leakage Control
- Dry Healthy Skin Environment
- Odor and Urine Neutralization
- Inhibition of Bacterial Growth

Superabsorbent Products can Complement Your Infection Control Efforts

- **1. Extended wear times and protection from leakage** minimizes preventable close contact between patients and caregivers to reduce the spread of illness.
- 2. Superior moisture wicking reduces the risk of incontinencerelated medical issues (such as skin breakdown and UTIs), helping to keep patients out of hospitals and lessen their risk of increased exposure.
 - 3. Maximum absorbency products keep patients comfortable and dry, leading to a better night's sleep which helps to boost the immune system and overall health.

Products to Help Improve the Quality of Life for Residents and Caregivers

Tranquility Premium OverNight™ Pull-on Disposable Underwear

Maximum Protection

- Available in sizes XS 2XL
- Worn like regular underwear to maintain normal toileting patterns

- Available in sizes S 2XL
- Accommodates individuals with limited mobility or in need of care assistance

 Thin, soft pad helps protect bedding, furniture, and equipment

Tranquility AIR-Plus[™] Bariatric Tape-tab Disposable Brief

Maximum Protection

- Available in size 4-5XL
- 100% breathable, stretchy side panels comfortably fit waist/hip sizes 70" to 108"
