*This absorbency category will change from Heavy to Super when Tranquility Premium packaging is updated in 2022.
**Capacity Under Pressure is a proprietary Tranquility test method that measures the product's retention capacity (the amount of fluid absorbed by the product that cannot be forced out with pressure), providing a more accurate representation of the product's absorbency under daily use. Capacity Under Pressure varies by product size. For comparison purposes, all capacities listed in this chart are for large-sized products.
