

Partnering to Help Clients Stay Home Longer

Falls, UTIs and skin infections are among the top hospital admission risk factors¹ for your homecare clients. Tranquility premium absorbent products are the solution that helps deter these risk factors, so your clients can remain in their homes longer, with enhanced security, safety and well-being.

Client benefits

- **Reduce incontinence-related falls:** Super-absorbent capacity to stop leaks and reduce urge to rush to the restroom.
- **Lower risk of skin issues and UTIs:** Superior moisture-wicking prevents skin breakdown and minimizes risk of wounds and infections.
- **Improve sleep:** Comfortable, longer-lasting wear time allows uninterrupted sleep to support the immune system and overall wellness.
- **Boost client self-confidence:** Reduces odor and accidents to promote higher-quality interactions.

Your Staff benefits, too!

- **Decreased burden and burnout:** Don't start the shift with a bed strip! Fewer linen, clothing and product changes, so staff can focus their time on more meaningful client interactions.
- **Reduce exposure to bodily fluids:** Longer product wear times and decreased need for changes reduce caregiver exposure to communicable disease.
- **Improved satisfaction scores:** Staff, clients and their families will give you five stars!
