

Calculating a Patient's Urine Output

Use the Product Dry-Weight chart to quickly calculate a patient's urine output. Weigh the wet disposable brief, underwear or pad on a standard scale, hanging spring scale or wheelchair/standing scale.

1. Determine product and size, find product dry-weight on chart
 2. Zero scale to recalibrate and weigh wet product
 3. Subtract dry weight from wet weight to calculate urine output
- TIP!** Weight in grams = Volume in milliliters (mL)

Wet weight
- **Dry weight**

Weight in grams
= **Volume in mL/cc**

Example: Tranquility SmartCore Brief - 2XL

500 grams wet weight
- 150 grams dry weight
350 grams or 350 mL/cc
urine output

Product Dry-Weight

Item #	Product Description	Dry Weight in grams
2311	Tranquility® SmartCore® Brief - Small	80
2312	Tranquility® SmartCore® Brief - Medium	99
2313	Tranquility® SmartCore® Brief - Large	120
